

# PRO SERIES<sup>®</sup> liquid COVER<sup>™</sup>

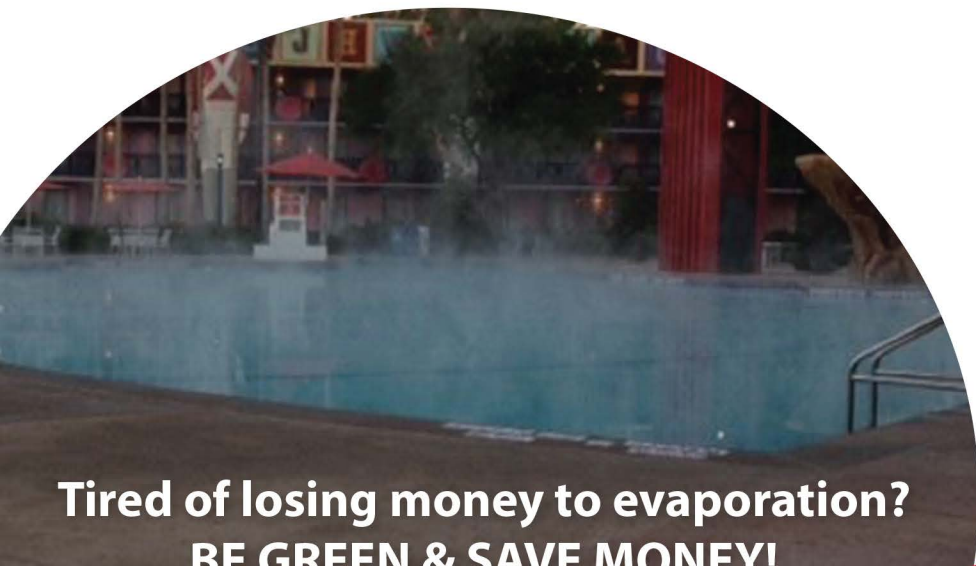

**SAVE MONEY! Be environmentally friendly by conserving our natural resources (including water, gas and/or electricity) and reduce your carbon footprint.**

- **Pro Series Liquid Cover** forms a molecular film/monolayer on the water surface. This single layer of molecules significantly reduces evaporation and works for both indoor and outdoor applications.
- **Pro Series Liquid Cover** cannot be seen, smelled or tasted after it is applied to the pool. It remains in place and/or reforms during swimming.
- Use less make-up water and balancing chemicals by using **Pro Series Liquid Cover**.
- **Pro Series Liquid Cover** reduces water and heat loss. The heating of pool water can be very expensive. The majority of heat loss by a swimming pool is caused by evaporation. Therefore, heat escapes the pool through the evaporation process, costing your facility money. **Keep the heat and reduce the costs.**

**Available Sizes:**  
**1 gallon- Part # 20711**  
**5 gallon- Part # 20715**

**Tired of losing money to evaporation?  
BE GREEN & SAVE MONEY!**
